

# Errata

---

- The next lecture has a correction.
- Since creating the video angular has been updated and `ng-messages-include` in AngularJS 1.4 now needs to be in it's own element under `ng-messages` .

## OLD (AngularJS <1.3)

```
<div class="form-errors"
  ng-messages="loginForm.email.$error"
  ng-messages-include="templates/form-errors.html">
</div>
```

Don't use this

## NEW (AngularJS >=1.4)

```
<div class="form-errors"
  ng-messages="loginForm.email.$error">
  <div ng-messages-include="templates/form-errors.html"></div>
</div>
```

Use this instead.
