Corrections

Before watching this section please pay attention to these corrections:

Official Batterang Plugin is now available

- The video recommends to ignore the official Angularjs Batterang plugin.
- The Angular team have now released an update to the Batterang plugin so please **ignore the advice in the video** and now install the official Batterang plugin from the Angular team.

Issue with the discussions panel and ng-inspector

- As of Jan 16th 2016 there is an issue with the discussions panel in the platform and the ng-inspector plugin which i recommend to install in the next lecture.
- The support team are looking into it but in the meantime please take this into account, switch off the ng-inspector plugin when trying to ask a question on the discussions panel.
